

Srishti Kumari

Bhopal, Madhya Pradesh, India — +91-8102393651
srishtikumari510@gmail.com — LinkedIn — GitHub

Professional Summary

MCA student (CGPA: 9.15) with strong foundations in Software Engineering, Data Structures, and Full-Stack Development. Experienced in building scalable applications using Java, Python, REST APIs, and SQL databases. Hands-on exposure to Generative AI and LLM-based systems. Passionate about developing efficient backend systems and modern web applications. Seeking a Software Engineering Internship to contribute to production-grade platforms.

Education

Master of Computer Applications (MCA)	2025–Present
VIT Bhopal University	CGPA: 9.15
Bachelor of Computer Applications (BCA)	2022–2025
Adamas University	CGPA: 9.16
Silver Medal – 9th Convocation — Merit Scholarship (2024–2025)	

Technical Skills

Programming Languages: Java, Python, JavaScript

Frontend: React (Basics), HTML, CSS

Backend: REST APIs, Flask, API Development, Microservices (Basics)

Databases: PostgreSQL, MySQL, SQL

Core CS: Data Structures, Algorithms, OOPs, DBMS, Operating Systems

Tools: Git, GitHub, VS Code, Linux, Jupyter Notebook

Emerging Tech: Generative AI, LLMs, LangChain, RAG Systems

Projects

RAG-Based Document Q&A System Python, LangChain, ChromaDB, REST APIs

- Developed a scalable document query system using Retrieval-Augmented Generation (RAG) enabling natural language interaction with large datasets.
- Designed backend pipelines for document ingestion, chunking, and semantic search.
- Integrated LLM APIs to generate context-aware responses.
- Built an interactive UI using Streamlit and exposed functionalities via REST APIs.

Affiliate Marketing Platform (LinkPls) PHP, JavaScript, MySQL

- Engineered a full-stack web application for tracking and managing affiliate links and analytics.
- Designed relational database schema to handle user data and click tracking efficiently.
- Implemented authentication and backend logic, improving user workflow efficiency by 30%.

Sentiment Analysis System Python, TensorFlow, REST API

- Built an NLP-based sentiment analysis model using LSTM for text classification.
- Developed backend APIs for processing real-time text input and returning predictions.
- Focused on modular and scalable API design.

Certifications & Achievements

- AWS Certified Cloud Practitioner – Amazon Web Services (2024)
- 5th Position – University Hackathon (2024)
- Silver Medal – Adamas University
- Merit Scholarship (2024–2025)
